eSCRIBE – Signs Partnership with SOFTPRO North America to integrate electronic signatures with its popular paperless meeting management solutions

Markham, ON (March 15-2011) eSCRIBE Solutions announced that it has entered into a partnership with SOFTPRO North America a leading provider of electronic signature solutions to healthcare, government, and financial institutions globally.

After a thorough investigation, eSCRIBE chose to integrate SOFTPRO's SignDoc software allowing meeting secretaries and elected officials to electronically sign reports, agenda's and minute documents generated from its industry leading paperless meeting management solutions built exclusively for Microsoft SharePoint. Once the signature is captured, the document is cryptographically sealed and unalterable without detection.

"SOFTPRO was excellent to work with and their SignDoc platform integrated easily with our solution," said Robert Treumann, President, eSCRIBE Solutions. "Ultimately, SignDoc allows us to provide our customers with a completely electronic process for both capture and verification that we can stand behind."

"With the implementation of a secure electronic signing process, eSCRIBE has further improved the environmental sustainability of their solution. They are an ideal partner for us in a market that is relatively untapped," added Rodney G. Vesling, President and General Manager, SOFTPRO North America.

As part of the partnership, eSCRIBE will be selling and marketing their enhanced solution to vertical markets across Canada and setting new standards of combining signature verification with paperless meeting management.

About eSCRIBE Solutions

eSCRIBE Solutions is a leading Canadian independent Microsoft Certified software development and integration firm located in Markham, Ontario Canada. They are the makers of eSCRIBE, a family of Paperless Governance and Meeting Management Solutions built exclusively for Microsoft's industry leading SharePoint collaboration and business integration platform and the Microsoft Office client suite. eSCRIBE can assist public or private sector board, committee or council members and administrators looking to efficiently improve transparency and governance while at the same time promoting environmental sustainability. For more information on eSCRIBE's features and benefits visit www.escribecorporate.com.

About SignDoc

SignDoc installs in minutes and immediately enables clients to sign PDF documents with legally binding electronic signatures. Because SignDoc produces an Adobe compliant digital signature, all you need to validate the integrity of the document and the signature in the future is the de facto standard Adobe Reader. Further, SignDoc provides unparalleled flexibility to sign any document format using SignDoc's built-in PDF
