

**Transform Board and Committee Meetings and GO GREEN with.....  
eSCRIBE Boardroom, Paperless Meeting Management Solution,**

Markham, ON (September 7, 2010) eSCRIBE Solutions today announced the general availability of **eSCRIBE Boardroom** the next version of its feature packed eSCRIBE paperless meeting management software solution designed specifically for the needs of public and private corporations and professional associations.

“We are pleased to reach this exciting point in the evolution of eSCRIBE the first truly paperless agenda and meeting management solution developed specifically for Microsoft SharePoint Server 2007/2010 and the Office Productivity Suite”, said Robert Treumann President, eSCRIBE. “eSCRIBE greatly improves the efficiency and transparency of board and committee meeting management while at the same time reducing the impact on the environment by eliminating dependency on the realms and realms of paper currently required to print and reprint proposal submissions and agenda packages which many times can be in excess of 250-500 pages each.”

Additionally, the firm announced that it had completed the installation of eSCRIBE Boardroom at the Professional Engineers of Ontario, where it will be used to manage their Board of Director meetings and over 30 sub-committees. “Ultimately eSCRIBE will be able to eliminate the paper from over 400 meetings per year. Assuming an average of only 6-8 participants per meeting, this represents a potential paper reduction in excess of 500,000 pages per year a huge financial and environmental savings”, added Treumann.

eSCRIBE Boardroom will be of particular interest to board secretaries, legal counsel and administrators that are responsible for the creation and management of board and committee meeting agendas, voting, minute publishing and distribution and meeting action logs.

**Benefits of eSCRIBE Boardroom:**

- Reduce the amount of paper generated for each meeting (Typically 250-500 pages per participant per meeting attended), reducing costs and saving the environment
- Improve the efficiency of staff in preparing and reviewing reports and submissions for meeting agendas
- Automate workflows to speed the approval of agenda items and common meeting functions
- Provide transparency of operation to employees, shareholders and customers

**About eSCRIBE Solutions**

eSCRIBE Solutions (eSCRIBE) is a Microsoft Certified independent Canadian software development and integration firm located in Markham, Ontario Canada and the makers of eSCRIBE a family of Paperless Agenda and Meeting Management Solutions built exclusively for Microsoft's industry leading SharePoint collaboration and business integration platform and the Microsoft Office client suite.
